Value
For Your
Money**

Data Loss is a Nightmare

Your data is worth US \$10,000.00 per MB!

You have invested a lot of TIME, MONEY and ENERGY to develop your business data. Whether they are sales records, proposals, receivables, presentations, formulas or client lists, these data are the heart and invaluable asset of your business that you can not afford to lose. Studies have shown that:

- 1 MB data is worth approximately US\$10,000¹
- Rebuilding just 20MB of lost data could cost more than US\$17,000 and could take up to three weeks to rebuild²
- A leaked record could cost you more than \$180 to rectify³
- Retrieval of data from a dead hard drive can cost you a fortune, and there is NO GUARANTEE that all the data can be recovered.¹

Data loss makes your business suffer

- Your business data go hand-in-hand with your business operations. The loss, or just temporary inaccessibility, of these data may threaten your hard earned business edge.
- Companies without proactive backup and recovery policies, are likely to be OUT OF BUSINESS within 2 years after the loss of their business data.⁴
- Loss of business data may ruin your companies reputation or lead to expensive litigation.
- Most importantly, it interrupts your business operation.

Conventional backup methods (e.g.- tape) are not good enough

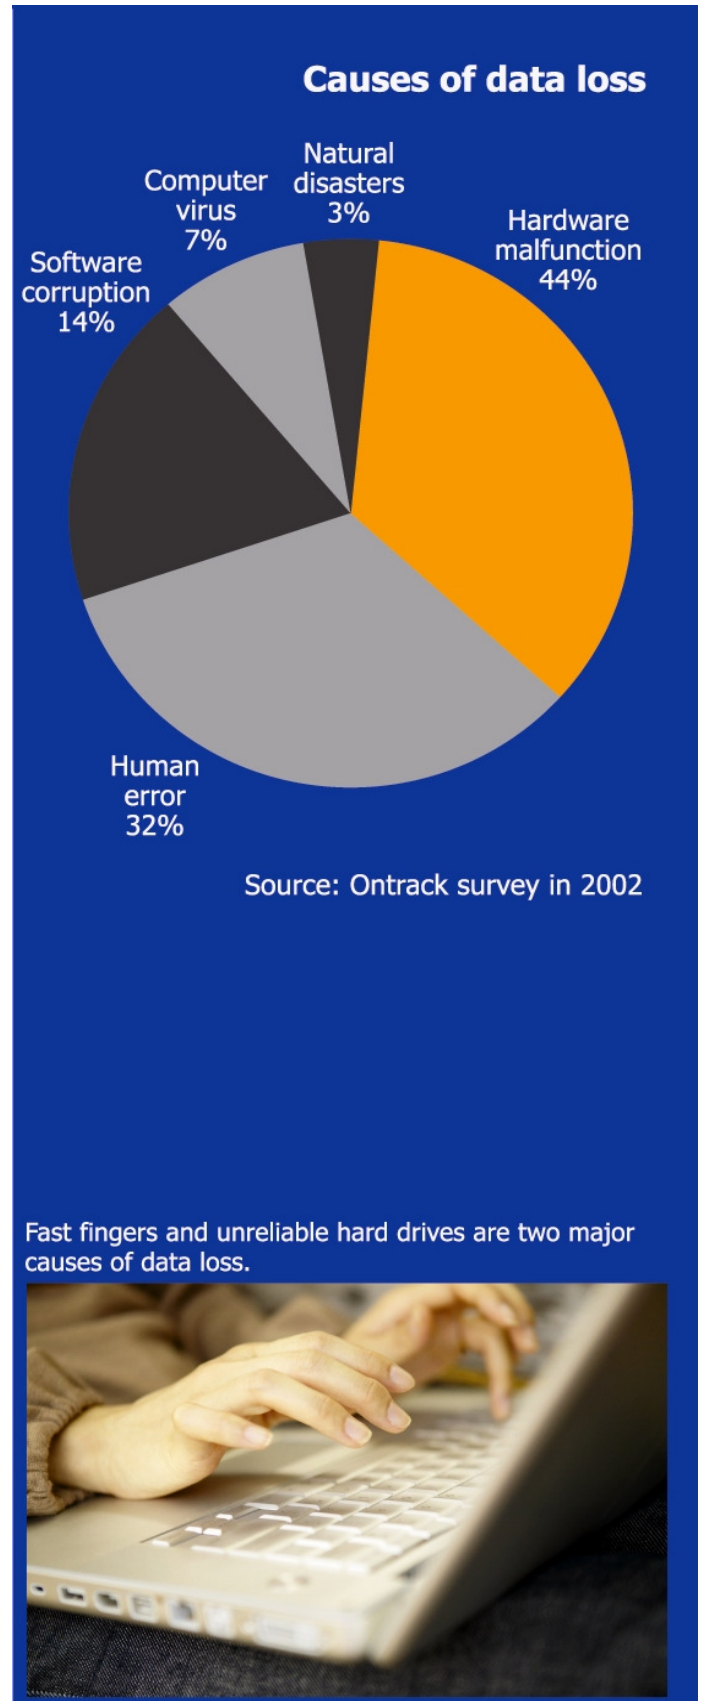

- High failure rates during restoration
- Problematic backup will not be detected until restoration is performed
- Slow read / write speed
- High maintenance cost
- Data are not encrypted
- Fixed capacity per backup media makes backup job less flexible
- Prone to negligence induced problems, e.g. lost or misplaced

The Ultimate Solution: DataSet Online Backup

Secure and reliable

Unlike conventional backup methods, your critical data is encrypted (128-bit!), compressed, and then uploaded to a REMOTE server hosted by us via Secure Sockets Layer (SSL) with enhanced security. Everything is run automatically with no human intervention required. This eliminates all possibilities of negligence induced problems. This robust design guarantees an extremely high rate of successful restoration.

Easy to manage

Installation of DataSet OBM is easy to follow with an intuitive wizard guided user interface. After simple configuration, backups will be done automatically without human intervention. Restoration can be done in just "A-Click". Anyone with basic computer skills will be able to manage it effortlessly.

Limited cost, unlimited protection

Once DataSet Online Backup Manager is deployed in your company, your invaluable data are protected from fire, vandalism, terrorist attacks, war and natural disasters, etc. While the cost of DataSetOBM is limited, the value of critical business data it protects and the potential benefits you can derive from these data are enormous and unlimited.

Flexible payment model

Our backup services pricing model is specially designed to suit the small budget of small and medium sized businesses.
